### DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

#### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 7, 8, and 10-13 are rejected under 35 U.S.C. 102(b) as being anticipated by U. S. Patent No. 4,843,309 to Kareem et al.

With respect to claims 1, 7, 8, and 10-13, Kareem et al. discloses apparatus for analyzing statistical characteristics of an input signal, the apparatus comprising: a signal input for receiving the signal ; an event detecting unit operatively coupled to the input for detecting events at which the signal level crosses a predetermined level with a predetermined slope (see col. 3, lines 38-44); combining unit for combining multiple versions of the signal, the versions being shifted with respect to each other by amounts corresponding to the spacing of said events, to form a representation of the signal (see Fig. 3 and col. 3, line 45 to col. 4, line 7); and measuring unit for measuring a parameter dependent upon the shape of said representation and indicative of a statistical characteristic of said signal (see col. 4, lines 8-18).

Art Unit: 2857

*Allowable Subject Matter*

4. Claims 2-6, 9, and 14-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

*Response to Arguments*

5. Applicant's arguments with respect to claims 1, 7, 8, and 10-13 have been considered but are moot in view of the new ground(s) of rejection.
